Project Name	Smart Lender — Applicant Credibility Prediction for Loan Approval
Maximum Marks	4 Marks

Persona: Priya — Credit Officer at a Mid-Size Bank

This empathy map represents the primary user of Smart Lender: a credit officer who reviews loan applications daily and needs a faster, more consistent way to assess risk.

SAYS

- “I review the same income/credit-history patterns over and over.”
- “I need a second opinion I can trust before signing off.”
- “Inconsistent decisions across officers create complaints.”

THINKS

- “Am I missing risk signals a model would catch?”
- “Could this applicant have been approved faster?”
- “I wish I had a quick risk score before deep manual review.”

DOES

- Manually cross-checks income, credit history, and property details.
- Spends extra time on applicants who are borderline.
- Escalates unclear cases to senior officers.

FEELS

- Time-pressured during high application volume.
- Cautious about approving risky loans.

Reassured when a second, data-driven opinion is available.
