

Project Executable Files

Date

06 July 2026

Team ID

Project Name

Smart Lender — Applicant Credibility Prediction for Loan Approval

Maximum Marks

3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide	Yes
3	requirements.txt	Yes
4	Database schema / seed files	NA (file-based CSV storage, no live DB in this iteration)
5	Environment configuration file (.env.example)	NA (no secret keys/API credentials used)
6	Deployed application URL	NA (running on local Flask server; add URL if hosted later)
7	APK / Executable binary	NA (web application)
8	Dockerfile / Containerization config	NA
9	Test files and test results	Partial — manual test cases documented in Performance Testing
10	Demo video or walkthrough	Yes (link below)

Step 2: File / Folder Structure

files/

app.py

rdf_model.json

scale1.pkl

requirements.txt

loan_prediction.csv

Loan_Prediction_Model.ipynb

README.md

RESULTS.md

static/css/style.css

templates/home.html

templates/input.html

templates/output.html

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	[Add if/when deployed; currently local only]
Login Credentials (Demo)	NA — no authentication required
Platform / Hosting Provider	Local (Anaconda); IBM Cloud per original architecture design
Repository Link	[Paste your GitHub repository link here]
Demo Video Link	[Paste your demo video link here]

Step 4: Run Instructions

- Open Anaconda Prompt (not regular PowerShell/CMD)
- Navigate to the project folder: `cd path\to\files`
- Install dependencies: `pip install -r requirements.txt`
- Run the app: `python app.py`
- Open a browser at `http://127.0.0.1:5000`

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	XGBoost models saved with pickle can fail to load across machines/versions	Resolved — switched to XGBoost's native .json save format
2	Regular PowerShell does not have project dependencies installed	Workaround — always run via Anaconda Prompt where packages were installed
3	No persistent database for storing past applications	Documented as future scope in Scalability & Future Plan
