

Project Initialization and Planning Phase

Date	06 July 2026
Team ID	
Project Name	Smart Lender — Applicant Credibility Prediction for Loan Approval
Maximum Marks	3 Marks

Define Problem Statement

The team defined problem statements from the perspective of both loan applicants and the credit officers who evaluate them, to ensure the solution serves both sides of the lending process.

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A salaried male applicant applying for a loan	Secure quick loan approval	I have a stable income and good credit history	Manual review takes days and feels opaque	Anxious about whether I qualify and when I'll know
PS-2	A self-employed female applicant with no co-applicant	Be assessed fairly despite irregular income	Self-employment income is harder to verify manually	Officers may apply inconsistent judgment across applicants	Worried about bias in the decision
PS-3	A bank credit officer reviewing 50+ applications weekly	Speed up low-risk approvals	I want to focus my time on genuinely borderline cases	Manual scoring is slow and inconsistent across officers	Overwhelmed by repetitive routine decisions
